

Wind Turbine Technician

Realise Energy Services Ltd.
Scotland

Due to continued growth in our wind turbine service and maintenance business, Realise Energy Services Ltd are looking for a wind turbine technician with extensive electrical experience to join our existing central Scotland team.

You will be employed as a Wind Turbine Technician which will involve a considerable amount of travel, primarily driving to sites, often in relatively remote locations.

Key roles and responsibilities:

- Carry out installation, commissioning, servicing, inspection, fault finding and repair on a range of wind turbines and their electrical, mechanical and hydraulic systems
- Assist with co-ordinating a weekly and monthly schedule of works as well as annual service schedules
- Assist with ensuring sufficient supplies of parts and consumables are available
- Producing work, service and inspection reports and recording findings in logbooks
- Refurbishment of wind turbines and components
- Ensure work is undertaken in an efficient and timely manner to meet deadlines and financial goals
- Ensure tasks are dealt with in a logical, organised and systematic manner
- Ensure all work is undertaken in line with the latest health and safety guidance and ensure you keep yourself up-to-date with relevant new guidance that is issued
- Maintain an up-to-date knowledge of all sites through documentation and discussion with staff and clients
- Where possible, anticipate potential problems with sites and identify potential solutions.

General Responsibilities:

- Communicate effectively, regularly and in a professional manner with supervisors, clients and contractors as appropriate
- Plan, manage and deliver your work to a high standard and in a professional manner in line with your experience
- Support the company's marketing and sales processes as required
- Provide client-facing services as appropriate
- Undertake any other activities, projects and tasks as required by the company
- You will be required to travel to our Perth office on a regular basis

Qualifications and Experience

Essential:

- A proven track record in electrical engineering, with good solid evidence of problem solving and fault finding.
- A minimum of an HNC or an equivalent recognised apprenticeship level in an Electrical discipline.
- Proven experience working with the 225kW to 850kW range of wind turbines.
- Willing to travel on a regular basis, including nights away from home.
- Computer and tablet literate and able to use Microsoft Office.
- Full UK Driving License

*If you do not have proven track record in electrical engineering please do not apply for this role
