

## Wind Turbine Technician

### Realise Energy Services Ltd.

### Omagh, Northern Ireland

Due to continued growth in our wind turbine service and maintenance business, Realise Energy Services Ltd are looking for a wind turbine technician with extensive mechanical and/or electrical experience to join our existing Northern Ireland team.

You will be employed as a Wind Turbine Technician which will involve a considerable amount of travel, primarily driving to sites, often in relatively remote locations.

#### Key roles and responsibilities:

- Carry out scheduled and unscheduled servicing and maintenance, wind turbine inspections, fault finding and repair on a range of wind turbines and their electrical, mechanical and hydraulic systems
- Assist with coordinating a weekly and monthly schedule of works as well as annual service schedules
- Assist with ensuring sufficient supplies of parts and consumables are available
- Producing work, service and inspection reports and recording findings in logbooks
- Refurbishment of wind turbines and components
- Ensure work is undertaken in an efficient and timely manner to meet deadlines and financial goals
- Ensure tasks are dealt with in a logical, organised and systematic manner
- Ensure all work is undertaken in line with the latest health and safety guidance and ensure you keep yourself up-to-date with relevant new guidance that is issued
- Maintain an up-to-date knowledge of all sites through documentation and discussion with staff and clients
- Where possible, anticipate potential problems with sites and identify potential solutions.

#### General Responsibilities:

- Communicate effectively, regularly and in a professional manner with supervisors, clients and contractors as appropriate
- Plan, manage and deliver your work to a high standard and in a professional manner in line with your experience
- Support the company's marketing and sales processes as required
- Provide client-facing services as appropriate
- Undertake any other activities, projects and tasks as required by the company

#### Qualifications and Experience

##### Essential:

- A proven track record in mechanical and/or electrical engineering, with good solid evidence of problem solving and fault finding.
- A minimum of an HNC or an equivalent recognised apprenticeship level in a Mechanical or Electrical discipline. Experience with Hydraulics would be an advantage.
-

- Willing to travel on a regular basis, including, in some circumstances, nights away from home.
- Able to work at height.
- Computer and tablet literate and able to use Microsoft Office.
- Full UK Driving License

\*If you do not have proven track record in wind turbine service and maintenance or mechanical/electrical engineering please do not apply for this role

**Desirable:**

- Proven experience working with the 225kW to 850kW range of wind turbines.
- GWO Working at Height
- GWO Manual Handling
- GWO First Aid
- GWO Fire Awareness
- Wind Turbine Safety Rules training
- Competent with using access platforms
- Experience with problem solving and fault finding of HV switchgear

Job Type: Full-time, Permanent
